1112

# RC4 – THE PERFECT SETUP FOR WINNERS

There is a revolution and its name is VACUUM FIT. VACUUM FIT is a ski boot technology that is also used in racing. Because the World Cup lays down clear rules. Our top athletes accept only the finest when it comes to top quality and outstanding characteristics. This is also reflected of course in the achievements of the Fischer Racing Team. World Cup winner Ivica Kostelić trusts in Fischer's set-up and does not want to do without the innovation in the ski boot sector. VACUUM FIT is becoming a ground-breaking technology that is causing a revolution in Alpine skiing.

In addition to this you will also find us in the new racing data base from the coming season. With RACE CODE you will have access to exclusive information concerning racing. Fischer makes this information available on the web and continues to uphold its values in doing so - top quality through innovation and technology.

To us, quality means no compromises! And in terms of design we have remained true to our line. White is in and also continues to lead the way for our racing skis. The strikingly different and unmistakable racing yellow continues to represent a strong brand and its success: Fischer Sports.

I would like to take this opportunity to thank all of you who have decided in favour of our racing products. As a result, you are not only in good company but have also joined the ranks of numerous World Champions and World Cup winners. Finally I would like to draw your attention to the fact that safety should be a significant success factor in racing. It is for this reason that back protectors now also feature in our new line. Our goal is to minimise the risk in skiing and considerably enhance people's enjoyment of the sport.

I wish you every success and a lot of pleasure with our 11112 racing line!

A handwritten signature in black ink, reading 'Siegi Vogltreiter'. The script is fluid and cursive.

**SIEGI VOGLREITER**  
Alpine Racing Director

## INTERNATIONAL RACING CAMP ERICH STURM

The International Fischer Racing Camp was founded in cooperation with the racing school run by Erich Sturm, himself an ex-racer and Olympic coach of the Austrian national team. Custom racing weeks in Hintertux, Austria, are offered in autumn for children, junior and adult skiers. Erich Sturm has put together various training programmes for the Fischer Racing Camp which can be adapted to suit each individual course participant. As on previous occasions, Michael von Grünigen of Switzerland, twice World Champion and four-times overall winner of the World Cup in Giant Slalom, will be assisting as guest coach. At the training centre in Hintertux you can train in the best conditions on a slope that is cordoned off especially for you.

### REGISTRATION AND INFORMATION:

#### ERICH STURM, FISCHER RACING CAMP

A-5092 St. Martin / Lofer 19

### DATES:

#### AUTUMN '11

16.10. – 21.10.

23.10. – 28.10.

30.11. – 04.11.

06.11. – 11.11.

## MICHAEL VON GRÜNIGEN RACE SKI CAMP 2011

Enjoy skiing with a passion for racing - this is exactly the message Michael von Grünigen has for children aged between nine and fourteen at the Fischer Junior Race Camp in Switzerland. And it would be hard to find anyone more qualified to do so than the former Giant Slalom champion, who himself is the father of three sons (all enthusiastic skiers). Michael von Grünigen on the idea behind the Race Camp: "I've made a point of concentrating on children who are at an age where they are normally not organised in squads that have their own camps. I aim more to show them how things will be later on when they make it into a team and give them an insight into the daily routine of training and competition so they are motivated to carry on. This is only possible if you show them the beauty of skiing and competition and if they enjoy it all. Which is why we don't only shoot through gates at our camp – we also take some time for the halpipo and skiercross."

### REGISTRATION AND INFORMATION:

**LOCATION:** Zermatt

## SKIS WITH WORLD CUP TUNING

**RACECODE**  
BY FISCHER RACE DEPT.

Fully in keeping with Fischer's philosophy, all the latest developments from the World Cup are integrated in our race skis. Fischer's new 11I12 race ski line stands out not only through T-Tuning, in which World Cup standards such as the Hole Ski technology, a special construction and finish (edge angle, base structure) are used, the brand new World Cup Label RACE CODE also guarantees the technological lead for racing pros and other ambitious athletes. Only the best material is good enough for the very special requirements of our athletes. The entire Fischer Racing Set-Up features a code that also acts as a login. Users of Fischer racing material will find lots of information about their top equipment on our specially designed online platform ([www.fischersports.com/racecode](http://www.fischersports.com/racecode)).

Additionally, World Cup specialists offer advice on how to handle the equipment properly and give an insight into the world of our ski stars. Plus, RACE CODE skis are also available with the whole new Flex Concept. Skiers can choose between two variations: Medium and Stiff. The varying degrees of hardness enable a very special set-up for the skier and skiing style. For individuality that gives you the lead!

### RACE CODE card & sticker

The corresponding individual RACE CODE which allows you to access our racing database on the web is shown on the card and sticker. The card or sticker comes with the race skis!

### Worldcup Tuning

Edge strength, material and angle correspond to World Cup standards. Special base grinding finish and structur (S 12) create a completely plane base surface with extremely good gliding properties.

# TIME FOR REVOLUTION

**VACUUM FIT**  
*FITS. GUARANTEED.*

## THE FIRST 100% ADAPTABLE SKI BOOT

The global innovation - the first ski boot that really has a 100 % fit!

Fischer VACUUM FIT technology makes it possible for the first time to have a completely anatomical fit of the entire boot in a quality that was previously unattainable. The easy adjustment procedure which is comfortable for the customer takes only 20 minutes. The basis for this is the new, patented Fischer VACU-PLAST material:

- Less weight (-15 %)
- Vibration damping better than conventional PU
- Temperature stability from +20° to -20° twice as high as with conventional PU.

The material can be reshaped up to five times.

### 1 WARM-UP

- Heat up the shell to 80 degrees Celsius in the oven

### 2 PRE-FIT

- Insert foot into preheated shell
- Put on cooling Pad and Compression Pad
- Adjust the stand position on the VACUUM FIT Station

### 3 PERFECT FIT AND COOL DOWN

- Adjust the entire boot to the anatomy of the foot using compressed air
- Use the Cooling Pad to cool it down

## RC4 WORLD CUP GS

**RACE CODE**  
**VACUUM FIT**

Our philosophy is to provide every racer with top material. This means that the original World Cup models for Giant Slalom are available with the same design for all athletes. The new Flex Concept is a red hot topic. The World Cup skis are available as Medium and Stiff models for even greater individuality. The skis are also in compliance with the FIS ruling, as you would expect. Women's skis must be R > 23 m, men's models R > 27 m.

# RC4 WORLD CUP SL

**RACE CODE**  
TECHNOLOGY  
**VACUUM FIT**

New: the Slalom ski is also available with the different hardnesses Medium and Stiff. The World Cup SL with its new Flex Concept and the technologies for the World Cup thus cater for the racer's individual and perfectly tuned requirements.

The 150 cm long women's model is not FIS compliant. This means that it is suitable only for school racers (Children II) as an extremely high-quality Slalom ski. All other ski models (lengths 165 and 155 cm) comply with the FIS ruling and are wider than 63 mm (middle of the ski) for women and men.

# RC4 WORLD CUP DH/SG

**RACECODE**  
**VACUUM FIT**

The harmonious setup featuring Wood Core, (double) titanium layer and H-WC plate to ensure you can really feel the smoother ride. With Air Carbon, this ski features yet another innovative technology from the World Cup. Fischer's speed skis are perfect when combined with the RC4 Z 18 FF Race Service binding. A package for winners in the speed sector. All ski models comply with the FIS ruling with a minimum width of 65 mm (SG) and 67 mm (DH) measured at the middle of the ski.

# CARE AND PREPARATION

## PREPARATION - FILING EDGES

1. Remove the sidewall: The sidewall ridge is filed away so the edge can be sharpened more easily.

2. Filing the edges: the idea edge angle for the sides of racing skis is  $86 - 87^\circ$  for perfect edge grip. Fischer racing skis have an edge angle of  $0.3^\circ$  (Slalom and Giant Slalom) and  $1.0 - 1.3^\circ$  (Super G and Downhill) when they leave the company. Filing jigs can be obtained in specialist sports shops. Step 1 rough file, step 2 fine finish using diamond file.

## PREPARATION - WAXING

1. Clean the base: Dirt, dust and wax remnants can be removed using a cleaning solvent obtainable from specialist sports shops.

Important: Before moving on to the next steps, dry the ski well (leave it outside for at least 15 minutes). An alternative is hot waxing (iron on wax and immediately scrape off soft gliding wax).

2. Apply wax: The wax is melted using a waxing iron and dripped onto the base of the ski.

Note: The waxing iron is at the correct temperature when the wax melts uniformly without forming smoke.

3. Iron on wax: The temperature needs to be set to between  $110$  and  $130^\circ\text{C}$ . The waxing iron is drawn across the base at a constant speed in the skiing direction.

Note: Do not iron backwards and forwards or concentrate on one spot because there is a risk of the base overheating.

4. Allow the ski to cool for 5 to 10 minutes before removing excess wax. Use a sharp perspex edge to remove the wax by applying constant, gentle pressure in the direction of skiing.

5. Brush the running surface with a nylon and/or combibrush in the direction of skiing. For the best possible gliding results, the structure of the base must be brushed thoroughly to remove any residual wax.
