RC4 – THE PERFECT SETUP FOR WINNERS

The Hole Ski technology with its mass reduction remains the key theme and focal point in development activities at Fischer. The World Cup is our guide. Our top athletes accept only the highest quality and the finest characteristics – and this is also reflected in the successes of the Fischer Racing Team. The Hole Ski has already secured numerous podium placings this season. World Champions and World Cup winners alike rely on the set-up from Fischer and can no longer imagine racing without our Soma-Tec boots. Ground-breaking innovations and technologies, high-tech with first-class quality. This is what the Fischer brand stands for and guarantees.

When it comes to quality there are no compromises – we stay true to our principles. We have, however, made notable changes to the design this year. White returns as the trend colour and it makes our skis a little more unassuming and discreet. You will still find Fischer's racing yellow, of course, as it represents both the Fischer brand and its values.

I would like to take this opportunity to thank everyone who has decided in favour of our racing products. You are in good and also high-profile company with numerous World Champions and World Cup winners. Let me close by drawing your attention to our skiwear. Fischer also guarantees that high-tech products of outstanding quality and only the finest materials are used for its apparel, too.

Wishing you every success and endless enjoyment with our 1011 Racing Line!

A handwritten signature in black ink, reading 'Siegi Voglreiter'.

SIEGI VOGLREITER
Alpine Racing Director

FISCHER RACING CAMP

AUSTRIA | SWITZERLAND

INTERNATIONAL RACING CAMP ERICH STURM

The International Fischer Racing Camp was founded in cooperation with the racing school run by Erich Sturm, himself an ex-racer and Olympic coach of the Austrian national team. Custom racing weeks in Hintertux, Austria, are offered in summer and autumn for children, junior and adult skiers. Erich Sturm has put together various training programmes for the Fischer Racing Camp which can be adapted to suit each individual course participant. As on previous occasions, Michael von Grünigen of Switzerland, twice World Champion and four-times overall winner of the World Cup in Giant Slalom, will be assisting as guest coach. At the training centre in Hintertux you can train in the best conditions on a slope that is cordoned off especially for you.

REGISTRATION AND INFORMATION: ERICH STURM, FISCHER RACING CAMP

MICHAEL VON GRÜNIGEN RACE SKI CAMP 2010

Enjoy skiing with a passion for racing - this is exactly the message Michael von Grünigen has for children aged between nine and fourteen at the Fischer Junior Race Camp in Switzerland. And it would be hard to find anyone more qualified to do so than the former Giant Slalom champion, who himself is the father of three sons (all enthusiastic skiers). Michael von Grünigen on the idea behind the Race Camp: "I've made a point of concentrating on children who are at an age where they are normally not organised in squads that have their own camps. I aim more to show them how things will be later on when they make it into a team and give them an insight into the daily routine of training and competition so they are motivated to carry on. This is only possible if you show them the beauty of skiing and competition and if they enjoy it all. Which is why we don't only shoot through gates at our camp – we also take some time for the halfpipe and skiercross."

SKIS WITH WORLD CUP TUNING

The hole ski, already used by Fischer in the speed disciplines between 1975 and 1985, is back in the World Cup. And the new hole ski made it to the podium from the very beginning. This is the reason why we have included it in this collection, fully in line with Fischer's philosophy: all the current developments in the World Cup have to be integrated in our racing skis. It is for this reason that the constructions of the 10 I 11 Fischer race ski range feature all the details of the skis used by World Cup skiers. Fischer racing skis are made in Austria by skilled hands and with true craftsmanship. And only the best materials are used for this purpose. Giant Slalom and Slalom models are available with different finishes: S-Tuning or T-Tuning. The skis are the same for both tuning options. T-Tuning skis, however, feature

the new hole ski technology. The hole in the shovel reduces the weight in the front and the mass of the ski is concentrated on its centre. This construction enables faster, constant edge grip with a smoother action and better turning. T-Tuning also requires more working steps than S-Tuning. With T-Tuning, for example, the skis are aligned manually, there is also a special measuring procedure for stiffness and additional stone grinding is used. T-Tuning skis are also somewhat stiffer than the S-Tuning skis. We recommend skis with T-Tuning for European Cup and FIS racers as they are tuned for slopes that have been iced with water, for artificial snow and for higher speeds and larger radiuses.

Worldcup Tuning

Edge strength, material and angle correspond to World Cup standards. Special base structure gives the ski a completely smooth running surface with exceptional gliding properties.

Air Carbon TI

Extremely light, extremely strong. The Air Carbon combined with Titanium ensures easier handling and optimum ski performance.

ORIGINAL V-POSITION

This is how we stand, walk and win.

SOMATEC®
POWER. GRIP. CONTROL.

Soma-Tec boots are different to conventional ski boots because of a unique stand position of the feet on the skis. The natural V-position of the feet is retained and the body's centre of gravity lies directly above the middle of the ski. This means you have perfect power transfer, optimum grip and absolute precision.

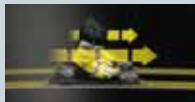

POWER

MAXIMUM POWER TRANSFER

SOMA-TEC harnesses all power exactly in the skiing direction.

- Perfect power transfer
- Maximum acceleration
- Less effort required

GRIP

ON CENTER POSITION

The stand position lies exactly on the centre of the ski.

- Perfect edge grip
- Faster and easier edge switches

CONTROL

ORIGINAL V-POSITION

The natural V-position of the feet is retained inside the boot.

- Better control
- Less strain on joints
- The natural motion sequence is retained

GIANT SLALOM

RC4 WORLDCUP GS

The original World Cup models for Giant Slalom. Two different models satisfy individual requirements. All skis with T-Tuning feature the Hole Ski construction and are a must for all racers. The skis comply with the FIS ruling, as you would expect. For women: R > 23 m, and for the men's models: R > 27 m.

SLALOM

RC4 WORLD CUP SL

The radiuses from the World Cup are also used for Slalom skis. All skis with T-Tuning feature the Hole Ski construction with the hole in the tip and the notch in the tail. The 150 cm long women's model is not FIS compliant. For this reason it should be used only by younger racers (Children II) as an extremely high-quality Slalom ski. All other ski models (lengths 165 and 155 cm) comply with the FIS ruling and are wider than 63 mm (ski waist) for men and women.

SPEED

RC4 WORLD CUP DH/SG

The harmonious setup featuring Wood Core, (double) titanium layer and H-WC plate to ensure you can really feel the smoother ride. With Air Carbon, this ski features yet another innovative technology from the World Cup. Fischer's speed skis are perfect when combined with the RC4 Z 18 FF Race Service binding. A package for winners in the speed sector. All ski models comply with the FIS ruling with a minimum width of 65 mm (SG) and 67 mm (DH) measured at the middle of the ski.

JUNIOR SLALOM

RC4 WORLDCUP SL JR.

Simply a must for the World Cup winners of tomorrow: Fischer's new junior Slalom ski with radical sidecut. Ideal for the short turns in modern Slalom skiing. Proven ideas and technologies that benefit adults in the World Cup are immediately integrated by Fischer in the junior models. The WC plate comes from adult racing. Fischer also has an ideal length concept for Slalom skis: lengths ranging from 130 to 150 cm are perfect for the FIS ruling.

CARE AND PREPARATION

PREPARATION - FILING EDGES

1. Remove the sidewall: The sidewall ridge is filed away so the edge can be sharpened more easily.

2. Filing the edges: the idea edge angle for the sides of racing skis is $86 - 87^\circ$ for perfect edge grip. Fischer racing skis have an edge angle of 0.3° (Slalom and Giant Slalom) and $1.0 - 1.3^\circ$ (Super G and Downhill) when they leave the company. Filing jigs can be obtained in specialist sports shops. Step 1 rough file, step 2 fine finish using diamond file.

PREPARATION - WAXING

1. Clean the base: Dirt, dust and wax remnants can be removed using a cleaning solvent obtainable from specialist sports shops.

Important: Before moving on to the next steps, dry the ski well (leave it outside for at least 15 minutes). An alternative is hot waxing (iron on wax and immediately scrape off soft gliding wax).

2. Apply wax: The wax is melted using a waxing iron and dripped onto the base of the ski.

Note: The waxing iron is at the correct temperature when the wax melts uniformly without forming smoke.

3. Iron on wax: The temperature needs to be set to between 110 and 130°C . The waxing iron is drawn across the base at a constant speed in the skiing direction.

Note: Do not iron backwards and forwards or concentrate on one spot because there is a risk of the base overheating.

4. Allow the ski to cool for 5 to 10 minutes before removing excess wax. Use a sharp perspex edge to remove the wax by applying constant, gentle pressure in the direction of skiing.

5. Brush the running surface with a nylon and/or combibrush in the direction of skiing. For the best possible gliding results, the structure of the base must be brushed thoroughly to remove any residual wax.
